

**WHAT IS CLAIMED IS:**

1. A method for displaying digital data broadcasting in a digital television system, the method comprising:

selecting a broadcasting screen to be displayed on each of displays by a user when a plurality of displays is connected and used in digital data broadcasting;

selectively mixing the broadcasting screen selected by the user in a set-top box; and

displaying the broadcasting screen selectively mixed in the set-top box on the plurality of displays.

2. The method according to claim 1, wherein the digital data broadcasting screen comprises an AV broadcasting screen, a data broadcasting screen, an OSD setting menu screen, and an Internet screen.

3. The method according to claim 1, wherein the plurality of displays comprises a monitor, a PDA, a portable terminal, and a touch screen.

4. The method according to claim 1, wherein each of the plurality of the displays comprises a controller.

5. The method according to claim 4, wherein the controller comprises a remote controller, a keyboard, a mouse, a keypad, and a touch pad.
